2002	73,912	4,252	5.75%	85,924	4,059	5.75%	80,113	786	0.98%	69,103	1,094	1.58%	309,053	10,191	3.30%
2003	58,300	2,166	3.72%	68,174	4,911	3.72%	72,361	1,372	1.90%	112,769	1,962	1.74%	311,605	10,412	3.34%
2004	45,427	4,634	10.20%	74,576	4,358	10.20%	71,015	2,438	3.43%	122,191	1,594	1.31%	313,208	13,025	4.16%
2000-2004	65,280	4,142	6.34%	73,690	4,264	6.34%	70,954	1,833	2.58%	100,390	1,688	1.68%	310,314	11,927	3.84%

Note: Hawaii low-income children age 0-18 are eligible for free medical assistance under the State's Medicaid program either through the basic Medicaid or SCHIP financing. In both cases, able-bodied children become QUEST beneficiaries. Eligibility for pregnant women and children follows national standards for the basic Medicaid program—pregnant women and newborns are income eligible up to 185% FPL, children aged 1-5 years are eligible up to 133% FPL, and children age 6-18 up to 100% FPL. The State Children Health Insurance Program (SCHIP) is administered as a Medicaid expansion and covers all children up to 200% FPL without regard to family assets. Thus, the Hawaii SCHIP program captures newborns residing in families with incomes 186-200% FPL, children age 1-5, 134-200% FPL and children age 6-18, 101-200% FPL. Throughout, eligibility is determined by the generous Hawaii-specific U.S. Department of Health & Human Services (HHS) Federal Poverty Guidelines. Missing income data have been imputed and the categorical income variables are converted through a simulation method to a continuous distribution before the Hawai`i-specific federal poverty guidelines are applied. Income data are based on the household unit.
